University of Maryland - College Park, MD	Expected: May 2028
Bachelor of Science, Computer Engineering	
Relevant courses: Differential Equations and Linear Algebra for Engineers, Calculus 3	
Poolesville High School - Poolesville, MD	Aug 2020 – May 2024
High School Diploma	Weighted GPA: 4.86

SKILLS

Java, Python, MATLAB, Fusion 360 CAD, Onshape CAD, MS Products

WORK EXPERIENCE

Johns Hopkins Applied Physics Laboratory | Laurel, MD

ASPIRE High School Academic Year Intern	Oct 2023 – May 2024
- Rendered 121 high-resolution images of lunar surfaces using MATLAB with over 540 precise annotations of lunar craters - Trained the YOLOv8 deep learning model to effectively detect lunar craters using the generated dataset, improving detection accuracy and reliability, and contributing to advancements in automated analysis techniques in planetary science - Co-authored an unpublished research paper titled "Deep-Learning Crater Detection and Segmentation for Autonomous Navigation," advancing AI-driven methodologies for space exploration and autonomous systems	
ASPIRE High School Summer Intern	July 2023 – Aug 2023
- Collaborated with a team of two colleagues to optimize camera parameters for NASA's Dragonfly prototype, significantly enhancing its performance and operational performance - Presented key findings to the Dragonfly's Navigation team, influencing critical design decisions for Dragonfly's navigation system
